Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the closest prior art reference of record is the non-patent literature reference to Steensgaard. However, the reference fails to teach or suggest the features of generating a plurality of heap portions which are each designated for storing objects that have similar class – traits and translating a Java Bytecode into one or more commands that can operate to locate a Java object in a heap portion that is designated for that object.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
